# Organization & History

## Organizational Framework

## Corporate History

- 1954 • Takeda Riken Industry Co., Ltd. founded in Itabashi, Tokyo.  
• We commence sales of our first product, the Micro Micro Ammeter.
- 1957 We commence sales of the first electronic counter made in Japan, the TR-124B Universal Counter. This marks the beginning of Takeda Riken's fame as a maker of digital counters.
- 1958 We are the first to successfully market a vibrating capacitor electrometer in Japan: the TR-81.
- 1959 Our headquarters and plant are moved to new facilities in Asahi-cho, Tokyo.
- 1962 We launch sales of the TR-3189, the world's highest performing and most direct 105 MHz electronic counter.
- 1963 We launch sales of Japan's first commercial digital voltmeter: the Digital Multimeter.
- 1971 We launch sales of the TR-4100 Tracking Scope: the world's first all-around frequency analyzer.
- 1972 We launch sales of Japan's first and fastest IC test system (with a test speed of 10MHz), the T-320/20, and a memory test system, the T-320/30.
- 1976 Our T-310/31 memory test system becomes a best seller as the world's only practical DRAM tester.
- 1979 The world's highest-performing 100 MHz IC test systems, the T-3380 (general purpose) and the T-3370 (specialized for memory) are developed under the technical guidance of the NTT Musashino Electric Communication Research Lab.
- 1982 The T-3340 IC test system, developed as a strategic product for gaining worldwide market share, earns great acclaim and becomes a major hit.
- 1983 • Our stock is listed on the second section of the Tokyo Stock Exchange.  
• Our head office is moved to Nishi-Shinjuku, Tokyo.
- 1985 • Our company's stock is now listed on the first section of the Tokyo Stock Exchange.  
• Our name is changed to Advantest Corporation.
- 1990 We develop a Josephson effect based voltage standard system jointly with the National Institute of Advanced Industrial Science and Technology (AIST), in order to support standardization in Japan, serving as a model for national standards institutions worldwide.
- 1995 Our T5581 memory test system uses leading-edge CMOS technology to deliver high speed and high precision at a low price, becoming a hit both in Japan and internationally, and becoming a worldwide standard in synchronous DRAM testers.
- 2001 Our stock is listed on the New York Stock Exchange (NYSE).
- 2003 We launch sales of the T2000 test system, the world's first test system using an open architecture standard.
- 2004 Our head office is moved to Marunouchi, Tokyo.
- 2007 We establish a subsidiary in Sendai for the development and manufacture of MEMS switches and other electronic components.
- 2008 • We develop optical signal wave measurement technology with the world's highest bandwidth (820 GHz range) for testing future optical integrated circuits.  
• We launch sales of the T5503 memory test system for mass production testing of DDR3-SDRAM next-generation high-speed memory. The T5503 is certified as our first Green Product.
